SYNC

PROJECT UDYAM DIGITAL · ENTERPRISE TRACK A

Accel Saathi

An AI business advisor that discovers, quotes, verifies and activates an MSME bundle in one sitting: on WhatsApp, in the owner's language.

7.4% → 16.5% activation

Live in ≤5 days, not 17.6

₹15k → ₹6.7k per SMB

Team buri buri zaimon · NIT Karnataka (NITK)

Prohorj Babu Bormon · Mubashir Afzal

Prototype + code: github.com/praharj123barman-glitch/airtel-sync-saathi

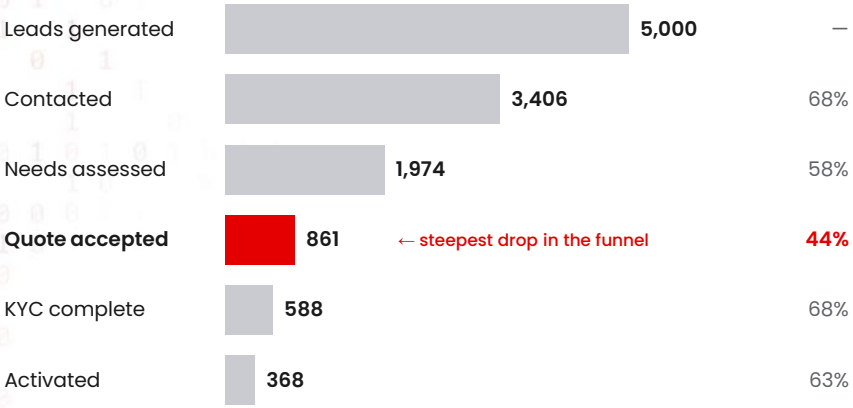

Platform Partner unstop

01 THE PROBLEM

Only 7 in 100 MSME leads get activated, and over a third of drop-offs come from our own process, not from price or demand

Lead funnel, Apr–Jun 2026

1,652 of 4,632 drop-offs (36%) are process failures we can remove

827	**Stalled waiting for a sales visit** Owner had no time 531 · visit never scheduled 296	→ AI advisor, any time
385	**Quote too slow or too complex** 3–5 day PDF full of product codes: 179 slow · 206 confusing	→ Instant one-price quote
273	**Stuck in KYC paperwork** Missing GST/Udyam 94 · too long 79 · signatory away 53 · mismatch 47	→ Smart KYC
167	**Lost after KYC** Install >21 days 98 · fibre not feasible 41 · first payment failed 28	→ Feasibility check + tracker

17.6 days
average from lead to activation

₹15,053
to acquire one SMB, vs a ₹6,900/mo median bundle

3×
each customer chased status before going live

54% of activated bundles held none of the products the owner asked about: pitches follow targets, not needs

22 activations (6%) went live on cancelled or suspended GSTINs that manual KYC let through

Source: team analysis of smb_leads.csv (5,000 synthetic leads, Apr–Jun 2026) and mock_gstin_registry.csv. Drop reasons grouped by the last stage reached; 'process failures' = reasons a digital journey removes directly.

02 WHO WE WIN FIRST, WITH WHAT BUNDLE

Go digital-first with offices and micro retail; point the field force at the 21% of leads that bring 73% of new revenue

Professional offices

25% of leads · clinics, CA firms, coaching

WAVE 1 · DIGITAL-FIRST

Activation rate	11.1%
Median bundle / month	₹6,575
Cost per activation	₹10,695
Months of revenue to repay CAC	1.6
6-month churn	13.8%

OFFICE PRO

₹4,815–6,138/mo

Biz Fibre 300 + 4G/5G failover · 2–3 business postpaid · cloud email and endpoint security per desk · 1 TB backup

12 months · ₹1,500 one-time

HOW WE SELL

Saathi self-serve: WhatsApp + web

Micro retail & services

54% of leads · kirana, salon, pharmacy

WAVE 1 · ZERO-TOUCH

Activation rate	4.1%
Median bundle / month	₹2,470
Cost per activation	₹20,007
Months of revenue to repay CAC	8.1
6-month churn	22.7%

DUKAAN DIGITAL

from ₹1,198/mo

5G AirFiber (live in 2 days) or Biz Fibre 100 · 1–2 business postpaid · add Cloud POS, CCTV, WhatsApp catalogue

6–12 months · ₹0 setup on core

HOW WE SELL

Saathi self-serve + partner assist

Small multi-site

15% of leads · 3–10 store chains

WAVE 2 · DIGITAL-ASSISTED

Activation rate	11.0%
Median bundle / month	₹28,080
Cost per activation	₹15,614
Months of revenue to repay CAC	0.6
6-month churn	10.8%

CHAIN CONNECT

≈₹2,500/site/mo

Per site: Biz Fibre 100, failover, secure Wi-Fi, Cloud POS · HQ: postpaid lines, toll-free · optional SD-WAN

12–24 months · 8 sites ≈ ₹23,900/mo

HOW WE SELL

Saathi qualifies, specialist closes

Small manufacturers

6% of leads · auto parts, textiles

FIELD-LED · SAATHI TOOLS

Activation rate	12.8%
Median bundle / month	₹15,910
Cost per activation	₹15,324
Months of revenue to repay CAC	1.0
6-month churn	8.1%

FACTORY ASSURED

₹15,260/mo

Leased line 20 Mbps (99.5% SLA) + managed firewall · 4 business postpaid · cloud email · machine-monitoring IoT

24 months · site survey first

HOW WE SELL

Field-led; Saathi for quote + KYC

Metrics: smb_leads.csv, Apr–Jun 2026. Prices = catalogue floor price for the committed term (product_catalogue.csv); GST-only products are offered only to verified GSTINs. Months to repay CAC = cost per activation ÷ median monthly bundle.

Saathi replaces a 17.6-day, field-led process with one 10-minute conversation on the owner's phone

1 Advisor

The owner shares a GSTIN (or Udyam number): Saathi reads the registries and proposes a bundle with zero questions for 73% of GSTINs; otherwise it asks 1–5.

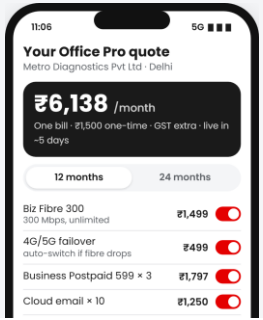

Targets 827 visit drop-offs

2 Quote & checkout

One monthly price from a rules engine, never the LLM. Add-ons and term toggle live; every quote carries a guarantee: 72 h or a firm date.

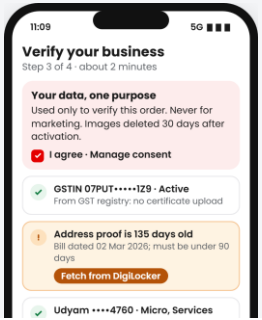

Targets 385 slow / confusing quotes

3 Smart KYC

Consent per purpose first. GSTIN checksum and registry status block dead GSTINs; a certificate photo is read by OCR on the phone.

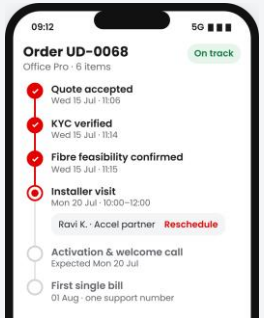

Targets 273 paperwork drops

4 Tracker

Counts down to the quote's guarantee and credits month one if missed. Proactive updates and outage credits replace the 3 chase calls.

Targets 167 post-KYC losses

People stay in the loop

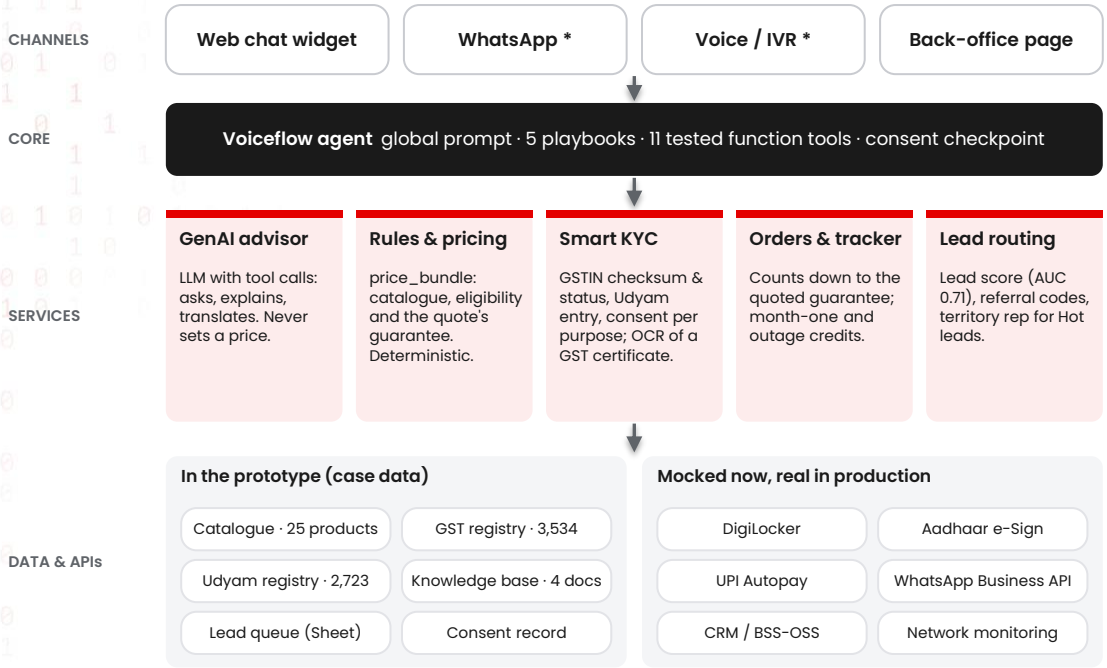

CA partners and customers refer with a checked code; rewards are paid only after the business stays 90 days.

Field sales focus on multi-site and factories (73% of new revenue); every Saathi hand-off arrives with full context.

Back office works a queue of leads Saathi couldn't close, ranked by a propensity model: the top 20% hold 40% of activations.

Built and tested in Voiceflow: 5 playbooks, 11 function tools, 308 automated tests. Zero-question share measured on all 3,534 registry GSTINs; Udyam entry covers 42.6% of leads without a GSTIN. Screens: lead L00068, IDs masked. Lead score AUC 0.71.

Rules decide, GenAI explains: every price and KYC decision is deterministic, auditable and built for the DPDP Act, 2023

Privacy by design · DPDP Act, 2023

Consent
Three purposes asked separately (registry lookup, KYC, offers), nothing pre-ticked, in the owner's language; each withdrawable any time in the chat.

Purpose limitation
KYC data is used only to verify and activate the order. Never for marketing, never to train models.

Data minimisation
Lookup before upload: if GSTIN and Udyam verify, no certificate is collected. We store extracted fields, not images.

Masking & access
GSTIN, Udyam and phone shown masked; the lead score sees business fields only, never a name or phone; partners see only their own leads.

Retention
A certificate photo is read on the owner's phone and never uploaded; the KYC record is kept only as long as telecom KYC rules require.

Built: Voiceflow agent + 11 JavaScript function tools (the rules, 308 automated tests) · demo site with in-browser OCR · back-office page. * Voiceflow channels for the same agent, not switched on yet. Code: github.com/praharj123barman-glitch/airtel-sync-saathi

Rivals offer either a bundle or a fast sign-up, never both: Saathi pairs Accel's install network with a zero-wait journey

	Full stack on one bill	Needs-based advice	Instant, clear price	Paperless KYC	Regional languages	Self-serve tracking	On-ground install network
Saathi (prototype) Accel Business	●	●	●	●	●	●	●
Accel Business today field sales, one product at a time	◐	○	○	○	◐	○	●
JioBusiness 7 fixed tiers from ₹901/mo (2021 launch)	●	○	●	◐	◐	◐	●
Vi Business ReadyForNext self-assessment	◐	◐	◐	○	○	○	◐
Tata Tele Business Smartflo, Smart Internet	◐	○	○	○	○	○	◐
Digital-first SaaS WhatsApp API, cloud telephony, POS	○	◐	●	◐	◐	●	○
Local ISP / reseller relationship-led, separate bills	◐	◐	◐	○	●	○	●

● offered ◐ partial ○ not evident in public information

Where Saathi wins

1 Right-sized, not fixed tiers
Saathi sizes the bundle to the business, which tackles the 414 'price too high' drop-offs without a price war.

2 Network + digital speed
SaaS players sign up in minutes but can't lay fibre or fit CCTV. Accel can do both in one order, on one bill.

3 A warm base to start from
38% of leads already use Accel, mostly mobile-only: Saathi can reach them on WhatsApp and pre-fill identity.

Watch-out: JioBusiness entry tier starts at ₹901/mo. We answer with value, not price: Dukaan Digital from ₹1,198 includes a business line and a 2-day AirFiber install.

Sources: JioBusiness launch coverage (Business Today, DQ India, Mar 2021); Vi Business ReadyForNext and PayU releases (2024–26); TTBS Smartflo / Smart Internet coverage; team assessment of public information, Nov 2026. Accel share of leads: smb_leads.csv.

06 IMPACT, METRICS AND ROLLOUT

Recovering half the process-driven drop-offs takes activation from 7.4% to 16.5% and cuts acquisition cost by 55%

Success metric	Today	6-month target	12-month target
Lead → activation conversion	7.4%	12%	**16%**
Days from lead to activation	17.6	≤ 7	**≤ 5**
Cost per activated SMB	₹15,053	₹9,100	**₹6,700**
Status chases per customer	3.0	1.0	**≤ 0.5**
6-month churn	15.2%	12%	**≤ 10%**
Guardrail: activations on invalid GSTIN	22	0	**0**

2.2× — **activations per 5,000 leads**
368 today → 608 at 6 months → 823 at 12 months

−55% — **cost per activated SMB**
₹15,053 → ₹6,729 at today's acquisition spend

₹3.8 Cr — **extra annual revenue per quarter of leads**
455 extra activations × ₹6,900 median bundle × 12

PHASE 1 · PILOT · M0–3

2 tier-1 cities · Hindi + English · professional offices · WhatsApp + web · A/B test against a field-sales control group

Gate: conversion ≥ 10% and CAC ≤ ₹10k

PHASE 2 · SCALE · M4–9

Micro retail on Dukaan Digital · all 10 lead languages · voice front end · partner assist mode live

Gate: micro CAC ≤ ₹3k

PHASE 3 · EXPAND · M10–18

Multi-site and factories in assisted mode · propensity-routed field queue · national rollout

Gate: 12-month targets met

Key risks → mitigation

- **GenAI mis-sells** → rules engine, not the LLM, sets price and eligibility; every answer logged
- **Channel conflict** → referral codes credit the partner; paid after 90 days
- **KYC fraud** → registry lookups, cross-checks, e-Sign, review queue
- **Costly promises** → 72 h only where data supports it: ₹93L → ₹52L credits per 1,000 orders

Model: stage conversion lifted by recovering 30% (6 months) or 50% (12 months) of the 1,652 process-driven drop-offs, cascaded through the funnel at the same acquisition spend; revenue at the ₹6,900 median bundle. Baselines: smb_leads.csv.
